Morso 3610 Radiant Wood Stove

\$2,699

Morsø 3610 wood burning stove

Developed specifically for the North American market, Morsø 3610 wood stove is the largest Morsø stove producing 60,000 Btu and heating areas up to 2,400 sq ft. A beautifully designed wood stove with clean lines, the Morsø 3610 radiant wood stove is ideal for rooms with cathedral ceilings that require a radiant heater for effective and efficient heating. In addition, this stove's large double doors make it perfect for heating large rooms.

Wood can be loaded into a Morsø 3610 wood stove from the front doors or through the easy-access side door. The large firebox accepts up to 24" logs and a specifically designed air channel helps burn the fuel as completely and efficiently as possible. The Morsø 3610 wood stove has two ash pans for convenient ash removal without manually shoveling out the ashes from the firebox.

Technical Details:

Max. Heat BTU/hr 60,000

Max. area heated 2400 ft²

Height 31 3/8"

Width 29 1/4"
