## Vermont Castings Stardance Vent Free Gas Stove

# \$1,200

Slightly smaller than the Radiance® vent free stove, the Stardance model offers the same ventless design, combining flexible installation and efficient heating into one convenient package.

### Maximum Efficiency

No heat lost — With no flue for hot air to escape through, **vent free cast iron** stoves from Vermont Castings provide an energy-efficient solution to your home heating needs.

### Reduced Clearances

Flexible installation options — Now you can enjoy the warmth of a gas stove even in smaller rooms and spaces. Vent free design requires less “clear space” between the stove and your walls and floors.

### Durable Cast Iron Construction

Long-lasting quality — Made from high quality cast iron that's 100% recycled, Stardance® vent free gas stoves are built to provide dependable heating throughout their years of service.

### Proudly Made In Vermont

Signature Vermont Castings style — The tradition of quality cast iron lives on in these vent-free gas stoves, which feature the unique detailing and solid construction that Vermont Castings is known for.

### Operable Front Doors

Open-door viewing — Simply swing open the two front doors for an unobstructed look at the Stardance® stove's realistic gas flames.
